Please find below and/or attached an Office communication concerning this application or proceeding.

Commissioner of Patents and Trademarks

Office Action Summary

Application No.

09/335,022

Applicant(s)

Monika Johannsen

Examiner

Sabiha N. Qazi

Group Art Unit

1616

☒ Responsive to communication(s) filed on 2/6/001

☐ This action is **FINAL**.

☐ Since this application is in condition for allowance except for formal matters, **prosecution as to the merits is closed** in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

A shortened statutory period for response to this action is set to expire 3 month(s), or thirty days, whichever is longer, from the mailing date of this communication. Failure to respond within the period for response will cause the application to become abandoned. (35 U.S.C. § 133). Extensions of time may be obtained under the provisions of 37 CFR 1.136(a).

Disposition of Claims

☒ Claim(s) 1-8 is/are pending in the application.

Of the above, claim(s) _____ is/are withdrawn from consideration.

☐ Claim(s) _____ is/are allowed.

☒ Claim(s) 1-8 is/are rejected.

☐ Claim(s) _____ is/are objected to.

☐ Claims _____ are subject to restriction or election requirement.

Application Papers

☐ See the attached Notice of Draftsperson's Patent Drawing Review, PTO-948.

☐ The drawing(s) filed on _____ is/are objected to by the Examiner.

☐ The proposed drawing correction, filed on _____ is ☐ approved ☐ disapproved.

☐ The specification is objected to by the Examiner.

☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. § 119

☐ Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d).

☐ All ☐ Some* ☐ None of the CERTIFIED copies of the priority documents have been
☐ received.

☐ received in Application No. (Series Code/Serial Number) _____.

☐ received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

*Certified copies not received: _____

☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).

Attachment(s)

☐ Notice of References Cited, PTO-892

☐ Information Disclosure Statement(s), PTO-1449, Paper No(s). _____

☐ Interview Summary, PTO-413

☐ Notice of Draftsperson's Patent Drawing Review, PTO-948

☐ Notice of Informal Patent Application, PTO-152

Office Action on Merits

Invention: The instant invention is drawn to process of isolation of vitamin D from an isomeric mixture which comprises carrying out the separation by column chromatography using supercritical or liquid carbon dioxide.

Continued Prosecution Application

1. The request filed on 2/6/001 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/335,022 is acceptable and a CPA has been established. An action on the CPA follows.

Status of the Application

Claims 1-8 are pending.

Claims 1-8 are rejected.

All claims are examined.

No claim is allowed.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Art Unit: 1616

Claims 1-8 rejected under 35 U.S.C. 103(a) as being unpatentable over Zhang et al. (CA 113:198104, abstract of Zhongguo Yiyao Gongye Zazhi (1990), 21(6), 256-61) in view of Lee et al. (CA 124:105153, abstract of J. Microcolumn Sep. (1995), 7(5), 477-83).

The instant invention is drawn to process of isolation of vitamin D from an isomeric mixture which comprises carrying out the separation by column chromatography using supercritical or liquid carbon dioxide.

Zhang et al. teaches the separation of 6 isomers separated by using irradiation technique and the purification on silica column (stationary phase).

Instant claims differ from the reference in claiming the liquid CO₂ for separation by column chromatography using liquid CO₂.

Lee et al. alleviates this deficiency by teaching the separation of coal tar vitamins and other related compounds. The enhance fluidity liquid mobile phase containing CO₂/methanol/water are used in a column.

These references are combinable because they are from the same field of endeavor.

Art Unit: 1616

It would have been obvious to one skilled in the art to combine the teachings of prior art supra to separate the vitamin D derivatives particularly when Zhang et al. teaches irradiation technique and the purification on silica column (stationary phase) and Lee et al. Teaches the use of liquid CO₂ for separation.

One skilled in the art would find ample motivation from the prior art to separate vitamin D derivatives as instantly claimed for the reasons cited above.

Nothing unobvious to separate the vitamin D as instantly claimed by the process known in the art, unless any unexpected results are seen.

The determination to employ the size and shape of the silica gel particles (claim 4) and use as stationary phase in claim 3 and would have been within the skills of the one familiar with the art. The selection of size and shape of Silica gel would be no problem for who is familiar with the separation techniques such as HPLC and column chromatography would know what type of silica or solvent should be used for better separation depending on the nature of the component in the mixture to be separated or purified.

Art Unit: 1616

One skilled in the art would know what type HPLC should be used for a particular separation i.e. reverse phase HPLC or normal phase HPLC. There are various types of column for HPLC are available in the market in different sizes for analytical or preparatory purposes having different types of resins or solid phases.

A reference is good not only for what it teaches by direct anticipation but also for what one of ordinary skill might reasonably infer from the teachings. *In re appreciate* 12 USPO d. 1235, 1236 (Fed Cir. 1989); *In re Bode* 193 USPO 12 (CCA 1976). A reference is not limited to working examples. *In re Fracalossi* 215 USPO 569 (CCA 1982).

Accordingly, the burden of proof is upon applicants to show that instantly claimed subject matter is different and unobvious over those taught by prior art. See *In re Brown*, 173 USPO 685, 688; *In re Best*, 195 USPO 430 and *In re Marosi*, 218 USPO 289, 293.

In the light of the forgoing discussion, the Examiner's ultimate legal conclusion is that the subject matter defined by the instant claims would have been obvious within the meaning of 35 U.S.C. 103(a).

Art Unit: 1616

Telephone Inquiry Contacts

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sabiha N. Qazi, whose telephone number is (703) 305-3910. The examiner can normally be reached on Monday through Friday from 8 a.m. to 6 p.m. The fax phone number for this Group is (703) 308-4556.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-1235.
